NEWS RELEASE

American Airlines adds seats, first class section to non-stop flights between ELP and LAX

EL PASO, TEXAS – American Airlines is upgrading its service between El Paso International Airport (ELP) and Los Angeles International Airport (LAX).

Starting tomorrow, AA will begin using 76-seat Embraer E-175 large regional aircrafts between the two airports. This upgrade will offer additional service options to passengers, including a two-class configuration with 12 First Class seats and 64 Main Cabin seats. The airline had been using a single class, 50-seat Bombardier CRJ-200 between ELP and LAX.

“We are pleased American Airlines will provide passengers additional upgraded service options to and from Los Angeles and most importantly the extra seats,” said Jeff Schultes, Airport Deputy Director. “This upgrade also serves the city’s strategic goal of creating an environment conducive to strong, sustainable economic development by growing the core business of air transportation.”

American Airlines Embraer E-175 daily nonstop service between El Paso and Los Angeles (LAX) begins November 5, 2015:

Departs LAX 8:10 a.m. Arrives ELP 11:14 a.m.
Departs ELP 11:45 a.m. Arrives LAX 1:00 p.m.

American Airlines also provides daily non-stop service from El Paso to O’Hare International Airport in Chicago, Dallas/Fort Worth International Airport, and Sky Harbor International Airport in Phoenix.
