Section 9.1 CLIMATE POLICY

It is the policy of the City of El Paso to use all available resources and authority to accomplish three goals of paramount importance: first, to reduce the City’s contribution to climate change; second, to invest in an environmentally sustainable future; and third, to advance the cause of climate justice.

Section 9.2 – DEFINITIONS

- A. Climate change: a phenomenon that includes both (1) the ongoing increase in the overall temperature of the earth's atmosphere, attributed to the greenhouse effect caused by increased levels of carbon dioxide, chlorofluorocarbons, and other pollutants; and (2) the side-effects of that temperature increase, including melting glaciers, heavier rainstorms, and more frequent drought.
- B. Climate jobs: jobs that advance one or more of the City’s policy objectives of (1) reducing the City’s contribution to climate change, (2) investing in an environmentally sustainable future, and (3) advancing the cause of climate justice.
- C. Climate justice; ensuring that historically underserved communities do not bear a disproportionate share of the negative impacts of climate change, while at the same time investing in those same communities as

part of the work to respond to climate change, mitigate its impacts, and build an environmentally sustainable society. For purposes of this analysis, “historically underserved communities” include Black, Indigenous, and people of color; people with disabilities; and people living at or below the poverty line.

- D.** Climate impact statement: a statement of how major City decisions impact the City’s climate policy. The statement is to be prepared by the Climate Department under the supervision of the Climate Director. The elements of the climate impact statement shall include, at a minimum, the following elements: (1) a statement of how the proposed action fulfills the three aims of the City’s climate policy; (2) an analysis of fossil fuel emissions and other climate change impacts of the proposed action; (3) a statement of any climate jobs that will be created by the proposed project; (4) a statement of whether the proposed action will negatively impact any historically underserved communities; and (5) a consideration of alternatives, if any, that would better advance the City’s climate policy.
- E.** Fossil fuel industry: the companies involved in the fossil fuel economy, including (a) companies that extract fossil fuel products including coal, oil, and natural gas from the earth; (b) companies that transport fossil fuel products; (c) companies that turn fossil fuel products into sellable products, including companies that operate refineries and other fossil fuel production facilities; (d) companies that convert fossil fuel energy into electricity by methods such as burning coal, oil, and natural gas; (e) companies that sell electricity generated by the burning of fossil fuel products; (f) companies that provide services to assist companies that conduct any of the activities described under (a), (b), (c), (d), or (e); and (g) companies that finance fossil fuel activities such as those described above. El Paso Electric shall be considered part of the fossil fuel industry for purposes of this climate policy.
- F.** Clean renewable energy: energy generated without burning carbon or releasing greenhouse gases. Includes renewable energy sources such as solar, wind, hydroelectric, and geothermal. Includes hydrogen energy that is produced by splitting water by electrolysis (“green” hydrogen) or hydrogen produced by solar-driven processes, but does not include hydrogen energy produced using natural gas (“blue” or “grey” hydrogen) or nuclear (“pink” hydrogen).
