Water storage improvements to the existing system are required to enable service to the subject property. There is an existing sixteen (16) inch diameter water transmission main along Edgemere Boulevard between John Hayes Street and Mike Price Drive. The development of the subdivisions located east of Mike Price Drive (Tierra Del Este Unit 71 and Tierra Del Este Unit 77) will require the extension of the described sixteen (16) inch diameter transmission main along Edgemere Boulevard between Mike Price Drive and Tim Floyd Street. This proposed sixteen (16) inch diameter water main will continue south along Tim Floyd Street to the southern boundary of Tierra Del Este Unit 77.

Water service to the subject property will be provided by a proposed elevated tank (reservoir) and the described sixteen (16) inch diameter water transmission main. No direct service connections are allowed to the proposed 16-inch diameter water main as per the El Paso Water Utilities – Public Service Board Rules and Regulations. Water service is anticipated to be provided by on-site water distribution main extensions. The on-site water mains mentioned above must be constructed by the Developer to provide water service to the subject Property.

Sanitary Sewer

There is an existing thirty (30) inch diameter sanitary sewer interceptor along Edgemere Boulevard between Mike Price Drive and Nevil Shed Street. This main dead-ends at approximately 145 feet east of Nevil Shed Street.

The development of the subdivisions located east of Mike Price Drive (Tierra Del Este Unit 71 and Tierra Del Este Unit 77) will require the extension of the described thirty (30) inch diameter sanitary sewer main along Edgemere Boulevard.

There is a twelve (12) inch diameter sanitary sewer main along Mike Price Drive located between Edgemere Boulevard and Ralph Seitsinger Drive.

EPWU-PSB requests master grading plans of the entire land study area to aid in the design of the sewer system to serve the property.

General

Coordination with the Developer is required to ascertain that the water transmission mains, storage improvements, and sewer interceptors are constructed in parallel with development.

EPWU requires a new service application to initialize design of the water and sanitary sewer main extensions to serve the subject property. New service applications are available at 1154 Hawkins, 3rd Floor. The following items are required at the time of application: (1) hard copy of subdivision plat; (2) finalized set of street improvement plans, including storm sewer; (3) digital copy of subdivision plat; (4) benchmark check; and (5) construction schedule. Service will be provided in accordance with the current EPWU – PSB Rules and Regulations. The owner is responsible for the costs of any necessary on-site and off-site extensions, relocations or adjustments of water and sanitary sewer lines and appurtenances.
