Department Comments

Planning and Inspections Department - Planning Division - Transportation

No objections to the rezoning.

Note:

All existing and/or proposed paths of travel (accessible sidewalks, wheelchair access curb ramps and driveways) located within public rights-of-way shall follow the City of El Paso Design Standards for Construction and be ADA/TAS compliant.

TXDOT

Requestor has to coordinate with TxDOT for the location of a proposed driveway. TxDOT will not approve a driveway until the owner or his engineer coordinate with the design or construction engineer.

El Paso Water

El Paso Water (EPWater) does not object to this request.

Water

There is an existing 8-inch diameter water main that extends along the south side of Montana Ave., approximately 13-feet north of and parallel to the southern right-of-way line of Montana Ave. This water main is available for service.

There is an existing 24-inch diameter water main that extends along the south side of Montana Ave., approximately 20-feet north of and parallel to the southern right-of-way line of Montana Ave. No direct service connections are allowed to this main as per the El Paso Water – Public Service Board (EPWater-PSB) Rules and Regulations.

EPWater records indicate there is no water meter serving the subject property.

Previous water pressure readings conducted on fire hydrant number 9916 located along Montana Avenue approximately 862 feet east of Wedgewood Drive have yielded a static pressure of 50 pounds per square inch (psi), residual pressure of 48 psi, discharge of 1,007 gallons per minute (gpm).

Sanitary Sewer

There is an existing 8-inch diameter sanitary sewer main that extends along the south side of Montana Ave., approximately 3-feet north of and parallel to the southern right-of-way line of Montana Ave. This sanitary sewer main is available for service.

General

Montana Ave. is a Texas Department of Transportation (TxDOT) right-of-way. All proposed water and sanitary sewer work to be performed within Montana Ave. right-of-way requires written permission from TxDOT.

EPWater requires a new service application to provide services to the property. New service applications are available at 1154 Hawkins, 3rd floor and should be made 6 to 8 weeks in advance of construction to ensure water for construction work. A site plan, utility plan, grading and drainage plans, landscaping plan, the legal description of the property and a certificate-of-compliance are required at the time of application. Service will be provided in accordance with the current EPWater Rules and Regulations. The applicant is responsible for the costs of any necessary on-site and off-site extensions, relocations or adjustments of water and sanitary sewer lines and appurtenances.

El Paso Water – Stormwater Engineering

1. Provide an acceptable drainage plan in accordance with Section 19.01.050 of the current City Ordinance.
2. The developer previously asked permission to connect to the stormwater pond in the rear. This property is not identified as part of any watershed considered in the design and capacity of the pond, so he needs to provide a drainage study, signed and sealed by a Professional Engineer from the state of Texas that can prove that the pond can handle this additional runoff.
3. The developer shall be responsible for the additional stormwater runoff generated by the proposed property, and must ensure that the historic runoff volume, peak and duration are maintained.
4. EPW - Stormwater Engineering recommends using principles of low impact & green infrastructure development (such as recessed landscaping, rainwater harvesting, and porous pavements) to reduce the amount of developed stormwater runoff and to mitigate adverse downstream drainage conditions.

NOW, THEREFORE, the parties do hereby mutually agree as follows:
