CHANGE ORDER PROPOSAL REVIEW COMMENTS

• Change Item No. 1 - 6: A proposal for the furnishing and installation of approved purple LED lights (as requested by Sun Metro) and related work and components was received in the amount of \$311,049.40 on April 10, 2018. The Drawings and Specifications failed to address the associated power supply drivers and related components. In addition, the LED linear footage for the Pylon structure was under quantified from the actual footage required. After thorough negotiations with the Contractor and CID, the proposal was found to be a fair and reasonable. The approved contract change amount totals \$311,049.40.

Refer to Attachments.

ORIGINAL/FINAL PROPOSAL

DYER CORRIDOR RAPID TRANSIT SYSTEM - LED PROPOSAL TXDOT CSJ 0167-02-050

Mr. Moreno,

Per the mockups that have been provided for the referenced project on the Canopy and Pylon LED's, our subcontractor proposed, the utilization of modified LED Lighting to address multiple issues prevalent on the Mesa RTS project. This proposal includes two separate items, 1 - to utilize the 150 White LED lighting and 2 - to utilize purple LED Lighting to achieve the desired colored effect Sun Metro required. Both proposals also include the connectors to address the twisted corners causing issue on the Mesa RTS as well as the associated drivers and wiring not reflected in the project plans and specifications. Also, JFC is willing to address the quantity underrun on the Pylon Lighting Linear Footage by transferring the quantity overrun on Canopy Lighting. This offer results in an approximate \$250,000.00 savings to the overall project. Please note, that if full quantities are not paid for both canopy and pylon LED lighting, the offer to transfer lighting is not applicable. Pricing for the white and purple LED lighting is shown below in lump sum with the delta increase to the existing unit pricing. Also attached is the subcontractor breakdown for the referenced items.

> Subcontractor Pricing for White LED's: \$233,562.00 GC OH/P per Contract: \$ 11,678.10

Bond Cost @ 1%: \$ 2,452.40 Total: \$247,692,50

Delta per LF: \$ 12.41/LF

Subcontractor Pricing for Purple LED's: \$293,442.00 <

GC OH/P per Contract: \$ 14,672.10

Bond Cost @ 1%: \$ 3,081.14

Total: \$311,195.24

Delta per LF: \$ 15.60/LF

TOTAL CONTRACT CHANGE + PRIME'S MARKUP = \$311,049.40.

If you have any questions in regards to this proposal or need additional information regarding the referenced White or Purple LED Lighting, please feel free to contact me directly.

Respectfully,

Matt Hardison Sr. Project Manager

RE:

Dyer Rapid Transit System Project

Project No. NH 2014 (453) TxDOT CSJ 0167-02-050 LED Lights and Drivers

Dear Mr. Hardison:

We have reviewed the available information provided by Jordan Foster Construction (JFC) in regards to the proposed power supply and LED lights needed for the Dyer RTS Canopies and Pylon structures. JFC has provided a proposal and mock ups addressing the end user's, Sun Metro, requests. We have investigated options and alternatives to provide a fair comparison to what the Contractor proposes. This outlines the background, analysis and suggested course of action.

Background

The Contract Documents included provisions for payment on the LED lights for the canopy and pylon structures under items ILLUM 2 – CANOPY SIDE LIGHT FIXTURE and ILLUM 4 – PYLON LIGHT FIXTURE. Estimated quantities included in the bid proposal are shown on Table 1.

Table 1 - Estimated Contract Quantities and Bid Prices

BASE BID	BID ITEM	ITEM No.	DESCRIPTION	UNIT OF MEASURE	APPROX. QTY.	UNIT PRICE	EXTENDED AMOUNT
BASE BID I (CITY's ROW)	162	ILLUM 2	CANOPY SIDE LIGHT FIXTURE	LF	5,808.00	22.00	127,776.00
BASE BIDT (CITTS KOW)	164	ILLUM 4	PYLON LIGHT FIXTURE	LF	280.00	120.00	33,600.00
DACE DID II /TYDOTI- DOM	146	ILLUM 2	CANOPY SIDE LIGHT FIXTURE	LF	11,652.00	22.00	256,344.00
BASE BID II (TXDOT's ROW)	148	ILLUM 4	PYLON LIGHT FIXTURE	LF	440.00	120.00	52,800.00
BASE BID IV (SPARE	2	ILLUM 2	CANOPY SIDE LIGHT FIXTURE	LF	2,500.00	22.00	55,000.00
MATERIAL)	3	ILLUM 4	PYLON LIGHT FIXTURE	LF	2.00	120.00	240.00

The Contract Documents specify the use of LED luminaries manufactured by *ELITE LIGHTING*. *Product number LB200-6500K* is specified for both the canopy and pylon structures. The Contract was entered with different unit prices per linear feet of LED (\$22.00/LF vs \$120.00/LF).

Compensation has been claimed for the required power drivers, wiring and connectors. In addition, in the absence of a detailed technical specification, it is not clear on what components are included or excluded

from the bid unit price. We've performed an independent quantity takeoff for LED's required per station and pylon to provide further reference. Table 2 presents our findings.

Table 2 - Independent Quantity Takeoff of required LED linear feet for Stations.

		Outbound	6' x 37'	395.0	134.0	529.0
		Total LED's fool	tage for Canoopies			9,326.0

^{*} Assumes the 6'x27' canopy requires three LED strips around the perimeter. All others require five strips.

We have quantified approximately **9,326-linear feet of LED** in contrast to the bid proposal quantity of **17,460-linear feet**. An estimated 60-linear feet of LED lights is required per pylon which overruns the current estimated bid quantity of 40 LF/pylon.

A mockup meeting for the presentation of the proposed LED lights for canopies and pylons was initially held on July 27, 2017. Several items were upgraded from the current design to address to provide the desired color by Sun Metro. A proposal accounting the upgrades was presented on April 16, 2018. The proposal includes two color options of LEDs and includes a pricing for the wiring, connectors, drivers and upgrades as presented in the mockup for the satisfactory operation. Additionally, a cost impact for the overrun quantity of LEDs for the pylon structure. Table 3 and 4, summarizes the current proposal.

Table 3 - Summary of cost increase for White and Purple LEDs

WORK ITEM	LED COLOR	BID QUANTITY	BID UNIT PRICE (\$/LF)	PROPOSED COST INCREASE (\$/LF)	TOTAL COST INCREASE	TOTAL COST INCREASE WITH JFC's MARKUP

Analysis

LED Lights

The proposal that the Contractor provided on April 16, 2018 establishes the use of a different vendor for LEDs called MaxBrite (in lieu of Elite Lighting).

MaxBrite product provides the following characteristics:

MaxBrite 5MW-70K150-12

- Color: Pure White (7000 K).
- · Voltage: 12 V.
- Lumens/foot: 153. (17 Lm/LED)
- Watts/foot: 2.16W. (36W per 16.4 ft reel)
- Life (hours): 50,000.
- 9 LEDS per feet (30 LEDS per meter).
- Drivers: 60W 12V driver powers one 20-foot run at 75% load capacity.

The proposal provided on April 16, 2018 establishes a \$3 USD increment per linear foot of LED for supplying Purple (\$7.20) in lieu of White (\$4.20), as desired by the end user, Sun Metro.

LED Drivers

At the estimated 9,326 total linear feet of LEDs established above, each requiring 2.16 Watt/ft according to the vendor spec, the total estimated number of 60W drivers needed would be 336 EA. Following the vendor's suggested best practice of running the drivers at 75%-85% of their capacity to increase the life-time, the total conservative estimated number of required drivers goes up to 448 EA. The proposal provided on April 16, 2018 quotes 932 EA. A similar estimate done for the Pylon drivers at 20 ft/driver, comes out to 3 drivers per pylon. The proposal quotes 6 drivers per Pylon.

As an alternative and due to space limitations, the use of 600-watt power supplies instead of the smaller 60-watt drivers may prove to be advantageous in terms of size, efficiency and installation costs. Going with the larger power supplies can reduce the total number of individual units needed, by close to a factor of ten (maintaining a comparable cost/watt), and with it, the overall real-estate and heat dissipation requirements. This may also positively affect the size and number of the heat extraction fans in the final design. One 600-

watt power supply driven at 80% of its capacity could drive eight separate circuits of 20 ft LEDs strips. In addition, the efficiency of a 600-watt power supply is normally higher than 90% under certain conditions, in contrasts to 86% for the smaller 60-watt drives. A typical profile of the 600 -watt power supply is 11" x 6" (see spec for Mean-Well model# HLG-600H-12) whereas, eight smaller MaxBrite 60 W drives will require an approximate area of 17" x 6", not including the required space in between each unit for convection cooling purposes.

The total required real-estate can increase to 19" x 12" or larger to drive 480W of LEDs. Given the nature of larger demand capacity power supplies, which are not constrained to a minimum power output, a recommendation could be to "fuse" each individual LED circuit and to limit their length size to 180 LEDs or 45 W each. See Figure 1 below:

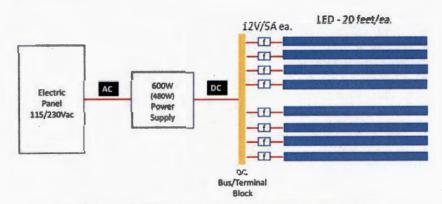

Figure 1 - Configuration of 600-watt Power Supplies

The above are recommendations only and JFC is directed to proceed with the shop drawings, wiring diagram, and procurement of a working system as displayed in the mockup presentation approved by the end user, Sun Metro. Furthermore, JFC has agreed to exhaust any canopy LED excess linear footage quantities up to the plan quantity, into the pylon LED installation.

Course of Action

ECM hereby requests for the Contractor to proceed with the fabrication of pylons/canopies contingent upon the following (the following action items are in accord with the conditions for the related Enclosure Units):

- ✓ Receipt of complete submittal addressing the LED system wiring plan for Engineer of Record's (EOR) review and approval including the driver placement and spacing layout per manufacturers recommendation.
- ✓ Receipt of complete product submittal/shop drawing for proposed cooling unit/heat dissipator incorporated into the pylon cabinet structure.
- ✓ Receipt of complete submittal including airflows and heat dissipation calculations for EOR's review and approval.
- ✓ Fabricate and install Pylon structure as per the mockup meeting held with CID and Sun Metro.
- ✓ Install Canopy LED lights as per mockup meeting held with CID and Sun Metro.

Sincerely,

ECM International, Inc.
